

Linux

- [Create new SSH key and add it to ssh-agent](#)
- [Enable new SSH key for login](#)

Create new SSH key and add it to ssh-agent

```
ssh-keygen -t ed25519 -C "your_email@example.com"  
eval "$(ssh-agent -s)"  
ssh-add ~/.ssh/id_ed25519
```

Enable new SSH key for login

On the local computer:

```
ssh-copy-id -i ~/.ssh/<KEY_NAME>.pub <USERNAME>@<REMOTE>
```
